

FACULTY WEB SITE TEMPLATE DESCRIPTIONS

Explanation about which template to use when creating a page or subfolder for a class.

Template Type When to Use

New Page – Class Page

- Use when you want a single page for listing weekly topics and assignments and posting PDFs.
- Good selection if you want to adjust your schedule that is included on your syllabus.
- See Example Class (page) for layout.
- Use the class abbreviation and no. for the file name, such as elit50.html

Example

www.deanza.edu/faculty/samplefaculty/SampleClass.html

Faculty CLASS new subfolder for a class

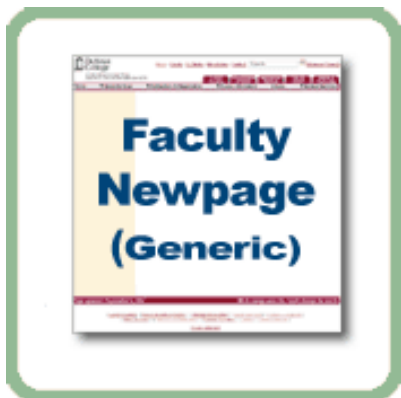

- Use when you want to use the CLASS subfolder template, which includes pre-created multiple files as determined by Web Team.
- Name the folder with the class abbreviation and no., such as elit50, bio10, es61

Example

www.deanza.edu/faculty/samplefaculty/SampleClass/

FACULTY WEB SITE TEMPLATE DESCRIPTIONS

Explanation about which template to use when creating a page or subfolder for a class.

Faculty Newpage (Generic)

- Use when you want to create a blank page for typing or pasting in your own content.
- **Best selection** if you want a basic page for posting assignments and lecture documents.
- **Use class abbreviation and no.** for the file name, such as elit50.html. After you create the new page, you can copy and paste the content from this sample page.

Example

www.deanza.edu/faculty/samplefaculty/sampleclass2.html

Sub Folder with Web Page FACULTY

- Use when you want to create a class subfolder for multiple pages but you want to create your own pages. This template will create an index (home) page within a folder.
- Name the folder with the class and no., such as elit50, bio10, es61

Gallery Lightbox Page

- Use to create a single page if you want to include a photo gallery on the page.
